

NORTHEAST OHIO CALVING WORKSHOP

Photo: beefmagazine.com

Thursday, February 22, 2018
6:30 to 8:30 P.M.

Ashtabula County Fair Expo Center
127 Elm Street
Jefferson, Ohio 44047

Calving issues cause stress and economic loss for many northeast Ohio dairy and beef operations each year. To help producers increase their calving management skills, we have invited Dr. Gustavo Schuenemann (OSU Extension Dairy Veterinarian) to share his calving expertise. This intensive clinic will offer dairy and beef producers calving management knowledge in a face-to-face and hands-on environment. Topics will include: what is normal and what is abnormal in calving, techniques for assisting delivery, trouble shooting delivery problems, factors causing calving difficulties, post-delivery problems, when to call for professional help, and the post-calving management & health.

Calving Simulator

The clinic includes about 1 hour of classroom instruction followed by 1 hour of hands-on demonstration. Participants will practice delivery techniques and newborn care management practices using a calving simulator developed by Dr. Schuenemann. This hands-on course is free and open to all dairy and beef producers in Northeast Ohio. 4-H and FFA youth will also gain valuable experience from this workshop.

Uterus/Calf Simulator

No registration is required. More information about this program can be obtained by calling the Ashtabula County Extension office at 440-576-9008. Do not miss this chance to increase your ability to handle the problem calving situations which challenge us during calving season.
